

BUNN ULTRA 2 OPERATING INSTRUCTIONS

1. **STARTING MACHINE:**

If using both tanks, start the machine by pushing the left and right side auger ON/OFF switches until AUGER ON appears. Next, turn on the left and right side control switches (OFF, ICE or CHILL) until ICE appears.

2. **ADD COLD WATER FIRST:** Then pour the desired flavors in from the top of the machine. Follow the mixing instructions. Depending on water and room temperature, allow about 60 to 120 minutes before serving. Cold water will speed up this process.

3. **USING BAR MIXES: DO NOT ADD ALCOHOL TO THE MACHINE** *(see detailed instructions on following page for mixing Strawberry Daiquiris, Pina Coladas & Margaritas)*

4. **ADDING MORE PRODUCT:** When mixing blades become exposed, repeat mixing instructions. It will take about 30 to 45 minutes before you can start serving again. When adding product, slide the top of the tank backwards.

5. **WHEN FINISHED USING THE MACHINE:** Turn off the machine. Empty the tanks. Add one gallon of warm water to each tank and drain. Do this twice. This helps rinse out the machine. Do not do any other cleaning.

BUNN ULTRA 2 WARNINGS & OPERATING TIPS

1) **KEEP IN COOL AREA:** Machine will not as work well outside or in temperatures over 25°. If operating outside, make sure to place machine in a shaded area and allow 3 to 4 hours to freeze, if it freezes.

2) **DO NOT USE EXTENSION CORD IF POSSIBLE:** Using the wrong extension cord could cause mixing delays and/or loss of power. A thin wire (non-industrial type) cord could starve the 120v compressor of needed electrical surge for proper operation. If extension cords are used, utilize heavy duty cords only.

3) **DO NOT ADD ICE TO THIS MACHINE:** This unit makes its own ice. The Bunn Ultra 2 has a reversing auger that gives you better mixing faster – this improves freeze time so that you have frozen drinks sooner.

4) **DO NOT exceed the “MAX” line, and DO NOT let the product drop below the “MIN” line**

5) **DO NOT** pour hot product into the tank(s)

BUNN ULTRA 2 OPERATING INSTRUCTIONS

FOR STRAWBERRY DAIQUIRIS, PINA COLADAS, & MARGARITAS

ONE SET OF MIXES PER TANK: All mixing instructions are for ONE tank only! Do not split amounts below into both tanks.

NON-ALCOHOLIC STRAWBERRY DAIQUIRIS (64OZ JUG) – DO NOT ADD ICE TO MACHINE: Pour one and a half 64oz bottle of STRAWBERRY CONCENTRATE into the empty tank. Add 2 gallons of cold water. Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy). **DO NOT MIX ALCOHOL IN THE MACHINE**, it will prevent the slush from reaching the right consistency.

- **For alcoholic drinks:** dispense the slush into a glass and add rum at that time and garnish with fresh sliced strawberries if desired.

NON-ALCOHOLIC PINA COLADAS (64OZ JUG) – DO NOT ADD ICE TO MACHINE: Pour one and a half 64oz bottle of PINA COLADA CONCENTRATE into the empty tank. Add 2 gallons of cold water. Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy). **DO NOT MIX ALCOHOL IN THE MACHINE**, it will prevent the slush from reaching the right consistency.

- **For alcoholic drinks:** dispense the slush into a glass and add light or gold rum at that time, and garnish with fresh fruit (pineapple slice, orange slice or maraschino cherry).

NON-ALCOHOLIC MARGARITAS (64 OZ JUG) – DO NOT ADD ICE TO MACHINE: Pour one and a half 64oz bottle of MARGARITA CONCENTRATE into the empty tank. Add 2 gallons of cold water. Allow concentrate and water to mix for approximately 60 to 120 minutes (or until slushy). **DO NOT MIX ALCOHOL IN THE MACHINE**, it will prevent the slush from reaching the right consistency.

- **For alcoholic drinks:** Pour one (1L) of white or gold tequila into a separate jug. Add twelve ounces of triple sec (about one half of a 750mL bottle). Mix well. Add Garnish with lime. Rim margarita glass with coarse salt or a mixture of salt and sugar.

Each of these mixes will make approximately 35 (8oz) servings per tank. Both tanks combined will make 70 (8oz) servings.

NON-ALCOHOLIC MIXING INSTRUCTIONS FOR SMOOTHIES & SLUSHIES (ONE SET OF MIXES PER TANK): All mixing instructions are for ONE tank only! Do not split amounts below into both tanks.

ARCTIC ICE/MR FREEZE 5 TO 1 MIX (SLUSHIES) – DO NOT ADD ICE TO MACHINE: Pour 2.5 gallons of cold water directly into the empty tank. Add one 64 oz. bottles of Arctic Ice Slush Mix. No mixing required. Allow 60 to 120 minutes to freeze.

Each of these mixes will make approximately 35-45 (8oz) servings per tank. Both tanks combined will make approximately 70-90 (8oz) servings. *Don't be afraid to mix flavors.
